Defense Quarters  
782B Liftbed Series

# All About Strength, Style & Storage

The 782-B Lift Bed is designed and built for strength, storage and security. It's solid wood construction is far superior to particle board and provides the ultimate in strength and durability. The Environmentally Farmed Timbers (EFT) are derived from the Heavea Brasiliensis tree which has a 20 year harvest cycle and is completely grown on plantations. This is a responsible, green friendly, source of beautiful hardwood. In Federal test this hardwood proved to be stronger than the Northern Red Oak and when finished the timber has the appearance of oak.

The 782-B Lift Bed (39.25"[W] x 81"[L]) provides an extra long sleep surface on a 312 in-line spring mattress for added comfort. The mattress utilizes the latest European slat cross members that flex as weight is applied to the surface. The bed mattress and underlying frame top raises easily, assisted by (2) two 90 lb. gas

filled cylinders. Under the mattress and frame a large storage area is revealed big enough to house all of a soldier's gear; 39.25"[W] x 81"[L] x 24"[D]. This storage area is vented on the wall sided of the bed.

Below, the bed unit sports (3) three solid wood drawers which fully extend supported by (2) two, one on each side, 150 lb. ball bearing drawer glides for superior strength and durability. These drawers can be further sub-divided with wood partitions to deliver optimal organization.

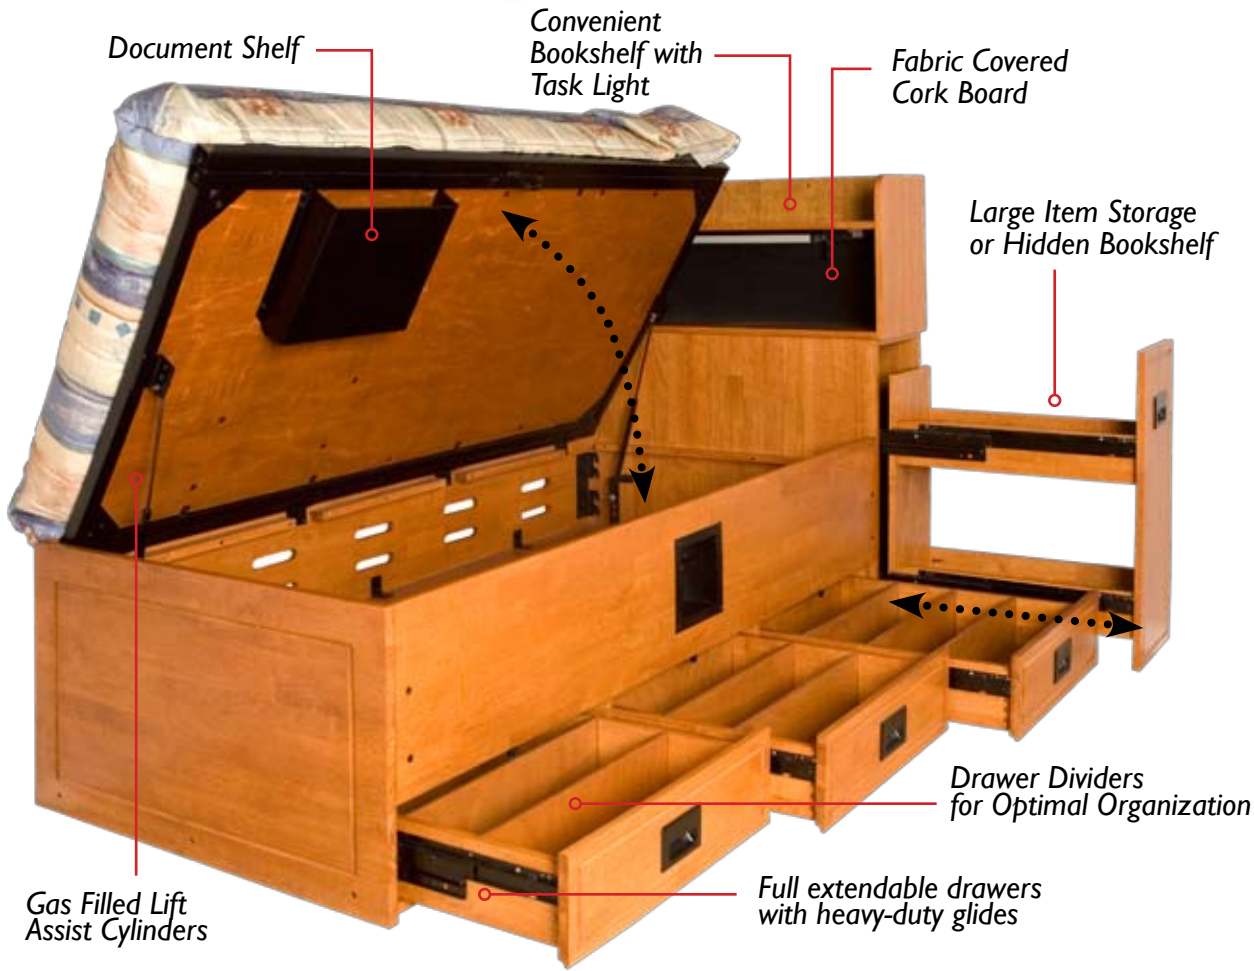

The under mattress, long, solid wood panel, is supported by a full angle iron frame and provides a secure lid complete with a heavy duty 4 way military grade locking handle and pad lock eyelet. This enables a Service Member to protect valuable equipment and personal belongings.

The headboard features a full service bookcase/carrel complete with task lighting and accommodating electrical outlets. The fabric covered tack board provides a convenient location for photos, memos and important papers.

A multipurpose (2) two shelf headboard storage pullout, with 150 lb. ball bearing glides, adds flexibility for additional books or large storage items.
